

GABRIEL MATHEUS OLIVEIRA

⚡ Systems Analyst | Industrial Automation Technician

📍 Uberaba – MG, Brazil 📞 +55 (34) 99289-1596 ✉ gab_matheus@hotmail.com

🌐 [linkedin.com/in/oliveiragm](https://www.linkedin.com/in/oliveiragm) 🐙 github.com/GabMatheus 🌐 <https://gabmatheus.github.io/Portfolio>

PROFESSIONAL SUMMARY

Systems Analyst with a strong technical and academic background. Multi-disciplinary experience integrating software and web development, business process automation, and industrial automation. Proven track record in designing and building Python-based scripts for routine automation, providing specialized ERP system support, and managing IT infrastructure. Additionally active in the industrial sector, specializing in automation and instrumentation by designing and modifying electrical blueprints in AutoCAD and programming PLC environments.

PROFESSIONAL EXPERIENCE

Automation Technician

📅 03/2026 – Present

KR Automação e Robótica

- Analyzed control loops, programmed Siemens PLCs using the TIA Portal platform, and developed supervisory systems (WinCC/SCADA).
- Assembled, wired, and interconnected electrical panels for command and automation systems.
- Drafted technical drawings, electrical schematics, and comprehensive project documentation.
- Maintained and developed internal software applications to support operational workflows.

Systems Analyst

📅 06/2021 – 10/2025

CONEFI LTDA

- Developed Robotic Process Automation (RPA) tools and Python scripts to optimize internal workflows and eliminate manual tasks.
- Handled system integrations and relational database management (SQL) to guarantee consistency and corporate data flow.
- Provided specialized tier-2 and tier-3 technical support for enterprise ERP systems (EMSys3, AutoSystem, Dominio, Mastermaq), focusing on troubleshooting and parameterization.
- Managed, maintained, and expanded local network infrastructure and servers for the IT department.
- Prepared operational reports and provided technical assistance for strategic decision-making in system improvement projects.
- Managed technology assets, covering hardware specification, procurement, and vendor technical alignment.

Industrial Instrument Mechanic II

📅 2016 – 2019

DBR Engenharia/Biano Engenharia

- Performed maintenance, calibration, parameterization, and diagnostics on industrial instruments and sensors.
- Installed and configured frequency inverters, three-phase electric motors, and electrical control panels.
- Executed electro-mechanical assembly of automated systems and industrial structured cabling.
- Read, interpreted, and executed complex electrical engineering blueprints and interconnection diagrams.

Engineering / IT Intern

📅 2014 – 2016

TV Integração (Globo Network Affiliate)

- Provided technical support for broadcasting systems and maintained local network infrastructure.
- Handled user support requests and monitored network operations.

EDUCATION

B.S. in Analysis and Systems Development

📅 Expected 06/2026

UFV / UNINTER

Curriculum focused on Software Engineering, Systems Analysis, Object-Oriented Programming (OOP), Software Architecture, IT Project Management, and Web Development.

Associate Degree in Electronics

📅 Concluded

CEFET-MG

Technical program covering industrial automation, digital and analog circuits, embedded systems, and micro-controllers. Practical focus on PLC programming and electrical control design.

TECHNICAL SKILLS

Automation & Systems

- PLC Programming (Siemens TIA Portal)
- Electrical Drafting (AutoCAD)
- Embedded Systems & Microcontrollers
- Industrial Instrumentation & Sensors
- Communication Networks & Industrial Protocols

Development & IT

- Databases (PostgreSQL, MySQL, SQL Server)
- Languages: HTML, CSS, JavaScript, Python, C, C++
- Version Control (Git) & Linux Environments
- Advanced Technical Support & ERP Administration
- Software Engineering & SOLID Principles

COURSES & CERTIFICATIONS

General English (B2 Upper-Intermediate)

 2019

OSCARS International – Dublin/Ireland

6-month international exchange program focusing on communicative fluency and professional proficiency in global environments.

PUBLICATIONS

Technical Papers in Information Systems

 2021

Academic Production

- Authored research focusing on software quality models, component-based architecture, and GPU architecture/applications.
-  [Repository featuring the LaTeX papers](#)
